

**BRAND POSITIONING**

Odyssey aircraft are the first of their kind in the aircraft manufacturing industry. After a decade of research and development, we have successfully developing and put into practice ground breaking technology that sets Odyssey aircraft apart.

We have achieved something that has been never done before – the capability of circumnavigating the globe in a passenger jet in less than a day.

This is an experience like none other. The potential to have breakfast in Paris, lunch in Sydney, and dinner in New York. In an Odyssey jet, access to the entire world is at your fingertips, or in this case, in your driveway.

---

**WHAT SETS US APART**

---

Odyssey currently has one aircraft available for purchase. This is our mid-size capacity jet that seats 6 to 8. This jet comes in 5 colors (shown below) that can be chosen upon order; as well as a variety of interior amenities that can be customized for purchase.

As we continue our research and development, Odyssey will continue to manufacture aircraft that continue to innovate and transform the industry. Our vision is to develop jets that encapsulate the future of flying; and guide the world into a new age of flying, the Renaissance.

---

## PRODUCTS & SERVICES

---

Odyssey currently sells to private aircraft charters as well as independent buyers. The Odyssey One, our first, groundbreaking jet, starts at \$5.5 million USD for the base model; all color options are included.

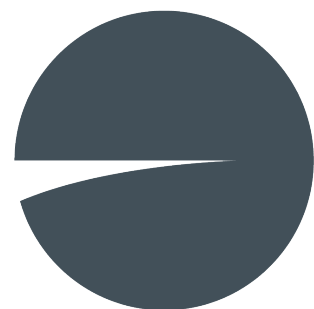

Orders can be made exclusively at an Odyssey Gallery. Currently, 6 Galleries are open around the world; located in New York, Los Angeles, London, Tokyo, Sydney, and Dubai.
